CONCERNS

Is there anything about your living environment that we need to consider when placing you? Please be specific.

PREFERENCES

Think about what you need to be an effective HA next year in terms of the type of students that you want to work with and the different area group dynamics you are most interested in (i.e. first year students, upperclassmen, social, autonomous). On a separate sheet of paper, please talk about the five area groups and rank them 1 to 6 in order of preference (1 being the most preferable; 6 being the least so) for where you want to live and work next year.

Please note: We are not looking for the specific room preference, but rather what types of theme dorms, communities, and leadership styles you want to work with. This is your opportunity to express what is important for you in your living environment and why.
